

Monitoring Solutions for Food and Beverage Production

Network of ECM Group companies is providing monitoring instrumentation for gases, liquids and solid particles.

Main Target Food and Beverage Applications:

- Breweries
- Soft Dring Production
- Dairy
- Coffe and Tea
- Sugar
- Wine
- Distillation
- Starch
-

Categories of ECM Monitoring Instrumentation for Food & Beverage Production:

- Composition of liquids
- Membrane filters
- Fermentation and crystallization
- Foam heigth
- Composition of powders
- Moisture / Humidity
- Filtration system
- Flow / Pressure / Level
- Industrial gas purily
- Package gases
- Spray drying process
- Cleaning processes
- Clean rooms
- Inerting of storage, transport and centrifuge systems

Main ECM partners for Food & Beverage solutions:

- K-Patents – refractometers

- Optek – photometric analyzers

- Klay – pressure / level monitors

- Sensortech – moisture

- Servomex – gas analyzers

- S::CAN – water analysis

- Steuma – storage, transport, centrifuge inerting
