

Toxic and combustible gas detectors

Broad range of stationary and portable toxic and flammable gas detectors. The instruments can be provided with a wireless transmission with a several kilometres range. Instrumentation allowing to set up in few seconds an accident site. The emergency team control has a permanent information about the risks the members are exposed to. Stationary systems can be installed in few minutes without any need of obstaculous cable connections.

Higher category of the instrumentation allows reliable detection of almost all kinds of hazardous gases.

- Personal monitors

- Site survey instrumentation

- Portable instruments

- Fixed instruments

- Wireless infrastructure

- Software
